DETAILED ACTION

1. 1, 4-13, 16-24, 26, 28-45, 48-52, 54 and 56-62 are pending in the application.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art does not expressly teach or render obvious the invention as recited in independent claims 1, 7, 12, 13, 19, 20, 24, 32, 40 - 44 and 51.

The prior art teach a figure of merit indicating a value for a member node to continue operation [column 4, lines 50 – 67 of Modiri], querying an user application program [col. 3, lines 45 – 52 of Mullen], the cluster management software and an application program determine a node's value [column 6, lines 30 – 35 of Modiri] and a cluster framework that includes modules such as the Cluster membership and quorum and reconfiguration that provides reconfiguration decision making [column 4, lines 50 – 67 of Modiri]. However, the prior art does not teach determining a figure of merit by a user application program by assessing merit criteria for the member node, where assessing merit criteria includes determining a number of users executing the user application from the member node (claims 1, 12, 13, 19, 20, 42, 43, 44) or determining an execution priority of the user application program (claims 24, 40, 41, 42, 43, 51). Further, the prior art does not teach requesting a node figure of merit from a user application executing on a cluster partition indicating a values for a member node to continue operation, evaluating node figure of merit to determine partition figure of merit,

selecting a cluster partition to operate as the network cluster in response to the partition figure of merit, and halting the remaining cluster partitions (claims 7 and 32).

Nor was a reference uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made would have integrated or further modified the cluster management system with determining a figure of merit by a user application program by assessing merit criteria for the member node, where assessing merit criteria includes determining a number of users executing the user application from the member node (claims 1, 12, 13, 19, 20, 42, 43, 44) or determining an execution priority of the user application program (claims 24, 40, 41, 42, 43, 51) or requesting a node figure of merit from a user application executing on a cluster partition indicating a values for a member node to continue operation, evaluating node figure of merit to determine partition figure of merit, selecting a cluster partition to operate as the network cluster in response to the partition figure of merit, and halting the remaining cluster partitions as recited in the context of independent claims 1, 7, 12, 13, 19, 20, 24, 32, 40 - 44 and 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
